

Gender Agenda International

Please allow us to introduce you to an innovative approach of ensuring women play their full part in building trusting relationships with communities and perform critical leadership roles in delivering change and transforming service delivery across both public and private institutions.

Whether you are looking to build safer and more resilient communities, enhance the status of women or achieve critical objectives that drive National Action Plans, Sustainable Development Goals or political manifestos; Gender Agenda International has the ability and credibility to shape and inform how you deliver successful outcomes.

Through a co-design approach we will work with you to understand the issues, identify obstacles, engage with critical groups and develop a framework of activity to monitor achievement against clearly defined objectives.

Women have a real strength and ability in presenting realistic and effective solutions. Allow us to enable you to access that strength and celebrate success in making a difference whatever your objective.

Detailed information can be found in the enclosed leaflet and we are happy to talk to you about your specific needs and how a bespoke solution can be created.
